

B1 MASTERY — CLASS 36 CONV — Conversational Teacher

Session 36/44 · 1h50min · Block 1 (Conv goes FIRST in this session) · IMMERSIVE MODEL — 4 long blocks

Date: ___/___/2026 · Attending: ___/___

Today's focus: oral application of B1 Book M3 — *Deduction / Expressing Suppositions*. Levels of certainty: very certain → MUST + base; partially certain → MIGHT / MAY / COULD + base; very certain of the opposite → CAN'T / MUSTN'T + base. Preview of perfect modals for the past ("must have been / might have gone / can't have done"). The Grammar Teacher formalizes the certainty table in the second block of this session.

Virtue: FORTITUDE v2 day 1 of 5 — **BLOCK OPENS TODAY** (block 36–40). JUSTICE v2 closed previous class.

Phrase of the Day: "Fortitude day one opens — when the facts run out, name the level of certainty out loud — must, might, could, can't — and stand behind the call."

BLOCK MAP — 4 LONG BLOCKS (110 min)

| # | Min | Block | Function |

| -- | -- | -- | -- |

| 1 | 10 | **OPENER** | Welcome + FORTITUDE day 1 OPENING + Phrase of the Day + 60-sec mystery + standing warm-up + bridge to M3 |

| 2 | 40 | **CONTENT OF THE DAY** | M3 Deduction ORAL: mini-talk (5–7 min) + guided pair practice with mystery cards (15 min) + free pair derivation (15 min) + cohort share (5 min) |

| 3 | 45 | **LIVE APPLICATION** | ONE immersive simulation — "OFFICE WHO-DID-IT / INFERENCE CALL" — rotating triads, no format change |

| 4 | 15 | **CLOSE** | Error paper recap + Frase close + Tarea + PASE A GRAMMAR — CL 36 |

Bring to class: Phrase of the Day already written on the board · "PASE A GRAMMAR — CL 36" blank sheet · the pase received from the Grammar block of the previous class (M2 closure) · 12 mystery-clue cards for guided pair practice · printed observer grid for the triads · Error Paper sheet · personal notebook (errors + NAMES, never shared aloud) · clock.

BLOCK 1 — OPENER — 10 min

(1 min) Welcome + frame

> *"Welcome to Cl 36 of 44. Today is Module 3 of the B1 Book — Deduction — Expressing Suppositions. Previous class closed M2 Either/Neither/Both and closed the JUSTICE block. Virtue: FORTITUDE — day ONE of five. Block OPENS today. Cl 40 will close it."*

(2 min) Phrase of the Day — on the board (already written)

PHRASE OF THE DAY — CL 36 CONV
"Fortitude day one opens — when the facts run out, name the level of certainty out loud — must, might, could, can't — and stand behind the call."

Read once slowly. Cohort echoes 2x. Quick gloss: "Deduction is what we do when the facts run out. 'Must' = I'm 90% sure. 'Might / May / Could' = I'm guessing, maybe 50%. 'Can't' = I'm 90% sure the opposite. Fortitude day 1: today we open a block of five days where the work is exactly this — making a call with incomplete information, naming the certainty, and not hiding behind 'I don't know'. By the end of the simulation today, every one of you will have made eight deductions out loud about a workplace mystery, with the certainty named."

(2 min) 60-sec mystery — fast diagnostic

> *"60 seconds. Each of you names ONE thing the Grammar Teacher's pase from the previous class flagged for fixing today — a double negative, a wrong verb agreement on neither-of, a 'both' used as 'también'. Go."*

Pick 3 students at random. If any asks about Final results: "Coordination handles results. Focus on what comes next." Note who did not bring homework.

(3 min) Warm-up — standing deduction speed round

Everyone stands in a circle. You give a one-line clue from an office scene; the next student says ONE complete deduction sentence using must / might / could / can't. Move fast — 8 prompts in 3 minutes.

"The CEO's office light is on at 11 PM." → "She must be working late."
"The dev team Slack is silent for two hours." → "They might be in a war-room meeting."
"The printer keeps jamming on every job." → "Someone could be using the wrong paper."
"The client hasn't replied for three days." → "They can't be available — they're on the conference."
"The conference room smells like coffee." → "Someone must have had a meeting in there this morning."
"The new hire is wearing the company T-shirt." → "He might be coming from onboarding."
"The IT lead is on a Zoom call with audio off." → "She could be in a panel — not a one-on-one."
"The fridge is full of cake boxes." → "It can't be a normal day — someone must be celebrating."

No corrections yet — just temperature. Note in your head who hesitated.

(2 min) Bridge to today's content

> *"Today's content is M3 — only the speaking side. The Grammar Teacher formalizes the certainty table in the next block. My job: get must / might / could / can't out of your mouth, fast, with the right verb after them — BASE form, no 'to', no -ing — and a preview of the past version: 'must have been', 'might have gone', 'can't have done'. The simulation today is an office who-did-it — colleagues figuring out what happened to a project, an email, a meeting. Eight rounds, rotating triads. Let's start."*

BLOCK 2 — CONTENT OF THE DAY — 40 min

(5 min) Mini-talk — three certainty levels in workplace dialogue

Talk standing, board behind you. Model EACH level out loud.

> *"Deduction in real work dialogue — three certainty levels, one verb pattern. Level ONE: VERY CERTAIN — 'must'. 'Maria isn't on the call — she must be sick.' 'Must' + BASE form, no 'to', no -ing. 'He must work late' — not 'must to work', not 'must working'. Level TWO: PARTIALLY CERTAIN — 'might', 'may', 'could'. Same pattern — 'might be', 'may have', 'could know'. These three are interchangeable in deduction; British English prefers 'may', North American prefers 'might' or 'could'. Level THREE: VERY CERTAIN OF THE OPPOSITE — 'can't' or 'mustn't'. NEVER 'don't must'. The negative for certainty is 'can't' — 'he can't be sick, he just ran 14 km'. Critical preview: when the deduction is about the PAST, we add 'have' + participle. 'He must HAVE been sick yesterday.' 'They might HAVE gone home.' 'She can't HAVE called — her phone was dead.' Fortitude day 1: the work is to make the call with incomplete information. 'I don't know' is the easy answer. The level of certainty named out loud is the hard one — and it's the one we want.'"*

Demo on the board:

PRESENT DEDUCTION (right now)
MUST + base → 90% sure "He must be tired."
MIGHT/MAY/COULD → 50% guess "He might be tired."
CAN'T / MUSTN'T → 90% sure opposite "He can't be tired."

PAST DEDUCTION (preview – full in Cl 38)
MUST HAVE + participle "He must have left."
MIGHT HAVE + participle "He might have left."
CAN'T HAVE + participle "He can't have left."

NEVER: "must to be" · "can't to be" · "don't must"

(15 min) Guided practice in pairs — 12 mystery-clue cards

Hand each pair the deck of 12 mystery-clue cards. They take turns: one reads the clue aloud, the other gives THREE deductions — one for each certainty level (must / might or could / can't). Then swap. Walk between pairs and physically correct on the spot — especially "must to be", missing "have" on past deductions, and "don't must" for the negative.

Card deck (one clue per card):

1. "Andres usually opens the office at 7 – today it was locked at 9."
2. "The board meeting was supposed to last 1 hour – it's now 3 hours in."
3. "The Q3 report has the wrong currency on every page."
4. "The new intern is asking everyone where the bathroom is."
5. "Maria's laptop is on, her coffee is hot, her chair is empty."
6. "The client signed the proposal – but didn't send the PO."
7. "The team standup got cancelled twice this week with no reason."
8. "The CEO's calendar shows a flight to Bogotá on Tuesday."
9. "The dev branch has 200 commits from one person overnight."
10. "The receptionist is wearing a suit – she usually wears jeans."
11. "Every desk in the marketing area is empty at 2 PM."
12. "The same Uber Eats order has been placed every day this week."

Coach softly while you walk: missing "have" on past deductions, "must to / can't to" with infinitive, "don't must" for negative, mixing up "may" (deduction) with "may" (polite ask). Note errors with NAMES in your notebook. Phrase of the Day INSERTION #2: *"Fortitude day 1 — name the certainty, don't hide in 'I don't know'."*

(15 min) Free pair derivation — "what happened to that project?"

Same pairs, no cards. Each pair invents 3 short office mysteries from real situations they've actually seen at work — a missed deadline, a quiet client, a tense standup. Build 6 deductions each, 2 per mystery, mixing present and past.

Board (write before class):

FREE PAIR DERIVATION – 3 MYSTERIES × 2 DEDUCTIONS (15 min)

Pattern per mystery:

A: [a 2-line real office mystery]

B: [2 deductions – 1 about NOW + 1 about the PAST, certainty named, verb pattern correct]

Example:

A: "The client signed the contract Friday but we still haven't received the deposit."

B: "They must be waiting for internal approval. They might have sent the wire to the wrong account."

Requirements per pair:

- 3 mysteries × 2 deductions = 6 total

- At least 2 PAST deductions

("must have / might have / can't have")

- At least 1 with CAN'T or MUSTN'T (negative certainty)

- At least 1 with COULD or MIGHT (partial certainty)

- At least 1 with MUST (high certainty)

- Fortitude day 1: no "I don't know" allowed – name the level out loud, even if the call is wrong

Rotate partners twice during this 15 min so each student speaks to at least 3 different people. Walk and coach. Listen for missing "have" — the most expensive past deduction error. Phrase of the Day INSERTION #3: *"Stand behind the call — fortitude day 1 is the level named, not the level dodged."*

(5 min) Whole-cohort share + 1 live correction

Two strong pairs perform 1 full mystery + 2 deductions each in front of the group (90 sec each). After the second pair, pick ONE error you heard during the 30-min pair work and correct it live with the cohort echoing 2× — your priority is the missing "have" on past deductions if it appeared. Then: *"Stand up — we move to the simulation."*

BLOCK 3 — LIVE APPLICATION — 45 min — "OFFICE WHO-DID-IT / INFERENCE CALL"

ONE activity, no format change for 45 minutes. Rotating triads. Every student plays every role.

(3 min) Setup

> *"Stand. You're three colleagues on a Friday afternoon, trying to figure out three things that went wrong at the office this week — a project that slipped, a meeting that ran late, and an email that got lost. You'll work in triads — three roles, rotating. INVESTIGATOR opens with the mystery and runs the conversation. COLLEAGUE A gives 4 deductions — mixing present and past, mixing high and low certainty. COLLEAGUE B gives 4 deductions on the SAME mysteries — must include 1 'can't' or 'mustn't' and 1 past 'must have' or 'might have'. So the round is 8 deductions total. OBSERVER tracks 3 things on the grid I'm handing out: how many deductions use the correct verb pattern (base form, no 'to'), how many past deductions include 'have' + participle, and whether each speaker NAMED THE LEVEL of certainty or hid in 'I don't know'. Three rounds. Each round 12 minutes. Every student plays every role exactly once. Fortitude day 1: name the call, even if it's wrong."*

Hand out printed observer grid (prepared before class):

OBSERVER GRID – CL 36 CONV – OFFICE WHO-DID-IT / INFERENCE CALL

INVESTIGATOR / A / B (this round): ____ / ____ / ____

Mark each deduction below as:

✓ = correct verb pattern + certainty named + level matches the clue

X to = "must TO be" / "can't TO be" (infinitive after modal)

X hav = past deduction missing "have" + participle

X neg = "don't must" / "mustn't" used wrong

X lvl = certainty mismatched (saying "must" when only "might" fits)

Deduction 1: _____ → ✓ / X to / X hav / X neg / X lvl

Deduction 2: _____ → ✓ / X to / X hav / X neg / X lvl

Deduction 3: _____ → ✓ / X to / X hav / X neg / X lvl

Deduction 4: _____ → ✓ / X to / X hav / X neg / X lvl

Deduction 5: _____ → ✓ / X to / X hav / X neg / X lvl

Deduction 6: _____ → ✓ / X to / X hav / X neg / X lvl

Deduction 7: _____ → ✓ / X to / X hav / X neg / X lvl

Deduction 8: _____ → ✓ / X to / X hav / X neg / X lvl

One sentence to the speakers at the end:

(~40 min) 3 rounds × ~12 min — rotating triads

Round 1 (12 min): Triads form. Roles assigned. INVESTIGATOR sets the mystery — "the Q3 report has the wrong currency on every page, what happened?". A and B alternate, 8 deductions total. Observer marks the grid. You circulate triad by triad — coach the verb pattern when wrong, kill "must to be" instantly, push for past deductions when the group sticks to present.

Round 2 (12 min): Rotate. New INVESTIGATOR, new A, new B, new OBSERVER. Same 8-deduction structure on a NEW mystery (the meeting that ran 2 hours over). By now the cohort knows the rhythm — push for SPEED. Deductions should land in 4 seconds. Push for at least 3 past deductions per round.

Round 3 (12 min): Final rotation. Every student has now played every role. Push for COMPLEXITY: at least one CAN'T or MUSTN'T per deduction speaker, and at least one full sequence "might have done X, must have done Y, can't have done Z" from the same person about the same mystery.

Phrase of the Day INSERTION #4 during round 2 transition: *"Fortitude day 1 — when the facts run out, the level of certainty is the work. Name it."*

(2 min) Cohort close

One strong triad demos 90 sec in front of the group — full INVESTIGATOR open, 2 deductions from A, 1 from B, observer reports back. Applause.

> **"Fortitude day one opens today. The block runs for five days — same virtue, same demand. Every day this week, when the facts run out, name the certainty out loud."**

BLOCK 4 — CLOSE — 15 min

(4 min) Error paper recap — 4 most common errors today

Write on the board (anonymous; NAMES only in your personal notebook):

ERROR PAPER — CL 36 CONV

1. ■ "He must to be sick." → ■ "He must be sick." (modals take BASE form, no "to")
2. ■ "They must left already." → ■ "They must HAVE left already." (past deduction = modal + HAVE + participle)
3. ■ "She don't must work today." → ■ "She can't be working today." (no "don't must" — negative is "can't")
4. ■ "He must working." → ■ "He must BE working." (continuous deduction = modal + BE + -ing)

Cohort echoes the 4 corrections in chorus 1x. Note the named version in your notebook for the audit report — do NOT say names aloud.

(3 min) Phrase of the Day close

1. *"Phrase from memory — one student."* Pick one at random.

2. *"Now paraphrase what FORTITUDE DAY 1 OPENING means for one real call you will make before next class with incomplete information."* Pick another at random.

(4 min) Homework — explained out loud

HOMEWORK CL 36 CONV – DUE: BEFORE NEXT CLASS CL 37, 7:00 AM
TIME: 30-45 min – NOT fragmented.

(1) WRITING – 10 min – 10 deduction sentences
about REAL situations at work or home this
week.

3 with MUST (high certainty, present)

3 with MIGHT / MAY / COULD (partial)

2 with CAN'T or MUSTN'T (high certainty
opposite)

2 with PAST deduction (must have / might
have / can't have)

Examples:

"The client must be on holiday – no
reply for four days."

"The deposit can't have been wired – the
account is still empty."

"She might be in the airport – her phone
just connected to airplane WiFi."

RULE: modals + BASE form, never "to". Past
= modal + HAVE + participle. Hand in on paper
next class.

(2) AUDIO eyes closed – 3 min – Record yourself
explaining one real office mystery to a
colleague – 5 deductions, mixing present and
past, mixing high and low certainty. Name
the level out loud each time. Fortitude day
1: name the call. Label: B1-CONV-36.

(3) LISTENING – 10 min – Find a YouTube clip of
a true-crime / news / business analysis show
(any source). Note 5 deductions you hear and
write the full sentence. Mark the certainty
level (HIGH / PARTIAL / OPPOSITE) and whether
the modal is about NOW or the PAST. Bring the
notes on paper.

RULE: Not fragmented. No "I didn't have time."

(4 min) PASE A GRAMMAR — CL 36 — fill + deliver

Fill the sheet titled "PASE A GRAMMAR — CL 36" in front of the cohort so they see the handoff is real:

PASE Conv → Grammar – Cl 36

3 form gaps observed in Conv today (literal):

1. [literal error] – student: [name]
2. [literal error] – student: [name]
3. [literal error] – student: [name]

Most common patterns today:

- "must TO be / can't TO be" – adding "to" after the modal (most frequent single error)
- Past deduction missing "have" ("They must left" instead of "They must HAVE left")
- "don't must" used as negative – needs explicit drill that the negative is "can't" / "mustn't"
- "must working" instead of "must BE working" – continuous deduction missing the auxiliary "be"
- Confusion between "may" (deduction) and "may" (polite ask) – context cue needed

Note: Cohort arrives at your block with present deduction in their mouth and past deduction previewed but unstable. Formalize the form from the book (B1 Book M3 pages 21–26: Guide 1 "Verbs of Deduction" p.23 with verbatim certainty table – Must / Might / May / Could / Can't / Mustn't; rule "It is very common to use deduction with the verb 'to be'. We often use it in the continuous and perfect tenses"; Examples p.24 with ~22 sentences mixing present and past; Exercises p.25 fill-the-modal). Cl 37 will need the past forms solidified for the third conditional bridge.

Schedule: Cl 37 = M4 Third Conditional – straight (B1 Book p.27+). FORTITUDE day 2. Cl 38 = M5 Could Have / Should Have – perfect modals + "I wish / If only" for regret. Cl 44 = Final (last 2h), calendar fact only.

Signed: Conversational Teacher

Hand it physically to the Grammar Teacher before the second block of this session begins.

Close (verbatim)

> *"See you next class Cl 37. Today opened FORTITUDE — day one of five — and Module 3 on the oral side. Today you made deductions with incomplete information, named the certainty, and stood behind the call. Next class is day TWO of fortitude — and Module 4 — Third Conditional — what would you have done. Homework due before next class, 7 AM. Any question about evaluations or the Final goes to coordination — not to me, not to the Grammar Teacher."*

DELIVERABLES TO COORDINATION

- [] Printed report filled
- [] Photo of board (Phrase of the Day + certainty table + free pair derivation requirements + Error Paper recap)
- [] Photo/video: warm-up speed round · one triad mid-simulation · cohort close demo
- [] Stack of completed observer grids from the 45-min simulation
- [] PASE from Grammar block previous class (archived) + PASE to Grammar Cl 36 (photo before delivery)
- [] Anonymous Error Paper (physical)
- [] List of students who did NOT bring homework (with NAMES)
- [] Personal notebook page: 3 literal errors + NAMES
- [] Count of Phrase of the Day natural insertions (target 4)
- [] Confirmed: FORTITUDE v2 block OPENED Cl 36 + day 2 next class announced as calendar fact

NOTAS INTERNAS (no leer en clase)

- **MODELO INMERSIVO (Diana 2026-06-18):** 4 bloques largos. Frase del Día + virtud + vocab + peer + shadowing INTEGRADOS, NO bloques sueltos. Inmersión profunda, profesor coachea desde el lado.
- **Virtud:** Cl 36–40 = FORTALEZA v2. Hoy día 1 — ABRE el bloque. Cl 37 = día 2 · Cl 38 = día 3 · Cl 39 = día 4 · Cl 40 = día 5 (cierra).
- **Próximo (Cl 37):** M4 *The Third Conditional — Straight* (B1 Book p.27–32, con Mixed previewed para Cl 38). FORTALEZA día 2.
- **Errores de más alto costo en M3:** (1) "must to be" — modal + infinitivo; (2) past deduction sin "have" — interferencia con past simple. Matar ambos en el momento.
- **Bridge a Cl 37–38:** el preview de "must have / might have / can't have" hoy es la base para el third conditional (Cl 37) y los perfect modals (Cl 38). Si hoy no se asienta el "modal + have + participle", Cl 37 sufre.

- **Cronograma:** CI 44 = FINAL PRESENTATION (últimas 2h del nivel — confirmado Diana 22/05). Anunciar SOLO como hecho de calendario.
- **GoldList ELIMINADO** desde 14/05. Solo Frase del Día.
- **Cohorte:** B1 Mastery. El cambio de Grammar Teacher (2026-06-15) no se menciona en clase — guías genéricas.
- **Frase del Día insertions target: 4** (board opener + Block 2 cards + Block 2 derivation + transición round 2 simulación).
- **Supuestos cargados:** Páginas del libro verificadas con pypdf (M3 pp.21–26 con Guide 1 p.23, Examples p.24, Exercises p.25; M4 pp.27–40; M5 pp.41–50). M3 no tiene Guide 2/3 separados — un solo guide de deducción con tabla de certeza.
